Safety

- Back on track
  - As of June 25: 123,400 safe work hours (2 mos. since last lost-time work injury)
  - One first aid – insect sting
  - Implementing Behavior-based safety program
  - Implementation of Safety Corrective Action Plan
    - Corrective actions centered on improved forklift operations and safe ladder use
    - Conducted a site-wide cleanup day intended to improve work area safety
  - A high-level Waste Quality Assurance audit was conducted by DOE
  - Overall program effective
    - Added recommendation for a three-year audit cycle
Work in Progress

- Low-level Waste (stored)
  - Processed and shipped ~20,000 ft³ YTD
- Remote Handled Waste Facility
  - Processing 26th and final box of waste for this contract period
- Main Plant Decontamination
  - Completed decontamination of the Analytical Laboratory cells
    - Challenging work was completed safely
    - High dose laboratory waste was solidified and removed (300R source)

---

Work in Progress

- FRS water treatment area work nearly complete
  - Pump Pit equipment removed
  - Applying fixative to water treatment area walls and floors
Work in Progress – Drum Cell

* Shipped total includes 10 rail cars being shipped June 30

Work in Progress

- Infrastructure Reduction
  - Schoolhouse GONE
  - Old Warehouse GONE
  - Maintenance Shop GONE
  - Test and Storage Building GONE
Planning

- Stored Liquid Management
  - Plan complete; transmitting plan to DOE for review/comment before 8/30

- North Plateau Groundwater Plume
  - Technical analysis of alternatives for containing the plume
    - Peer review completed
  - Recommendation: Near-term
    - Permeable treatment wall at leading edge, treat water surfacing in ditch

- NDA Cap
  - Cap and slurry wall design complete
    - 100 percent design review completed
