Subject: Cellulosic Ethanol Plant

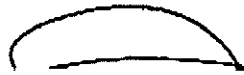

Dear Mr. Bell:

It was a pleasure meeting with Brian Flynn and Jerry Walter of your firm. I understand that you were fogged in at Dulles. I can assure you that Brian and Jerry did a great job representing your company.

As I indicated in my last letter, NYSERDA is very interested in locating a cellulosic ethanol facility in New York State. Your proposed integrated facility, as Brian described it, sounds like a very promising project.

At the close of the meeting, we told Brian and Jerry that we would let you know what further information we need before we begin the various processes that could lead to release of the property at the Western New York Nuclear Service Center for use in connection with the ethanol facility. After some discussion here, we have determined that in order to proceed, we would need a more detailed description of the proposed facility, including its emissions profile; a

Thanks again for your interest.

President and CEO
