Work in Progress

- Low-level Waste (stored)
 - Processed and shipped ~20,000 ft³ YTD
- Remote Handled Waste Facility
 - Processing 28th and final box of waste for this contract period
- Main Plant Decontamination
 - Completed decontamination of the Analytical Laboratory cells
 - · Challenging work was completed safely
 - High dose laboratory waste was solidified and removed (300R) source)

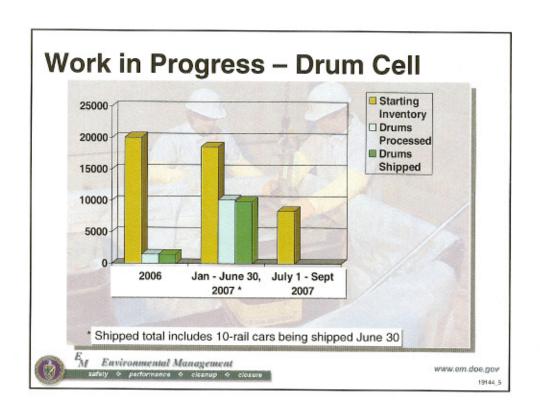

Work in Progress

- FRS water treatment area work nearly complete
 - · Pump Pit equipment removed
 - · Applying fixative to water treatment area walls and floors

FRS Pump Pit

Planning

- Stored Liquid Management
 - Plan complete; transmitting plan to DOE for review/comment before 6/30
- · North Plateau Groundwater Plume
 - Technical analysis of alternatives for containing the plume
 - · Peer review completed
 - Recommendation: Near-term
 - Permeable treatment wall at leading edge, treat water surfacing in ditch
- NDA Cap
 - Cap and slurry wall design complete
 - · 100 percent design review completed
